

Test Driven Development

Using JUnit to Test DVD.java

Produced Dr. Siobhán Drohan
by: Mairead Meagher

Waterford Institute *of* Technology
INSTITIÚID TEICNEOLAÍOCHTA PHORT LÁIRGE

Department of Computing and Mathematics
<http://www.wit.ie/>

Let's first write a complete test class
and then we will discuss the theory
behind it.

Testing DVD.java

DVD.java

```
public class DVD
{
    private String title;

    public DVD(String title){
        setTitle(title);
    }

    public DVD(){
    }

    public String getTitle(){
        return title;
    }
```

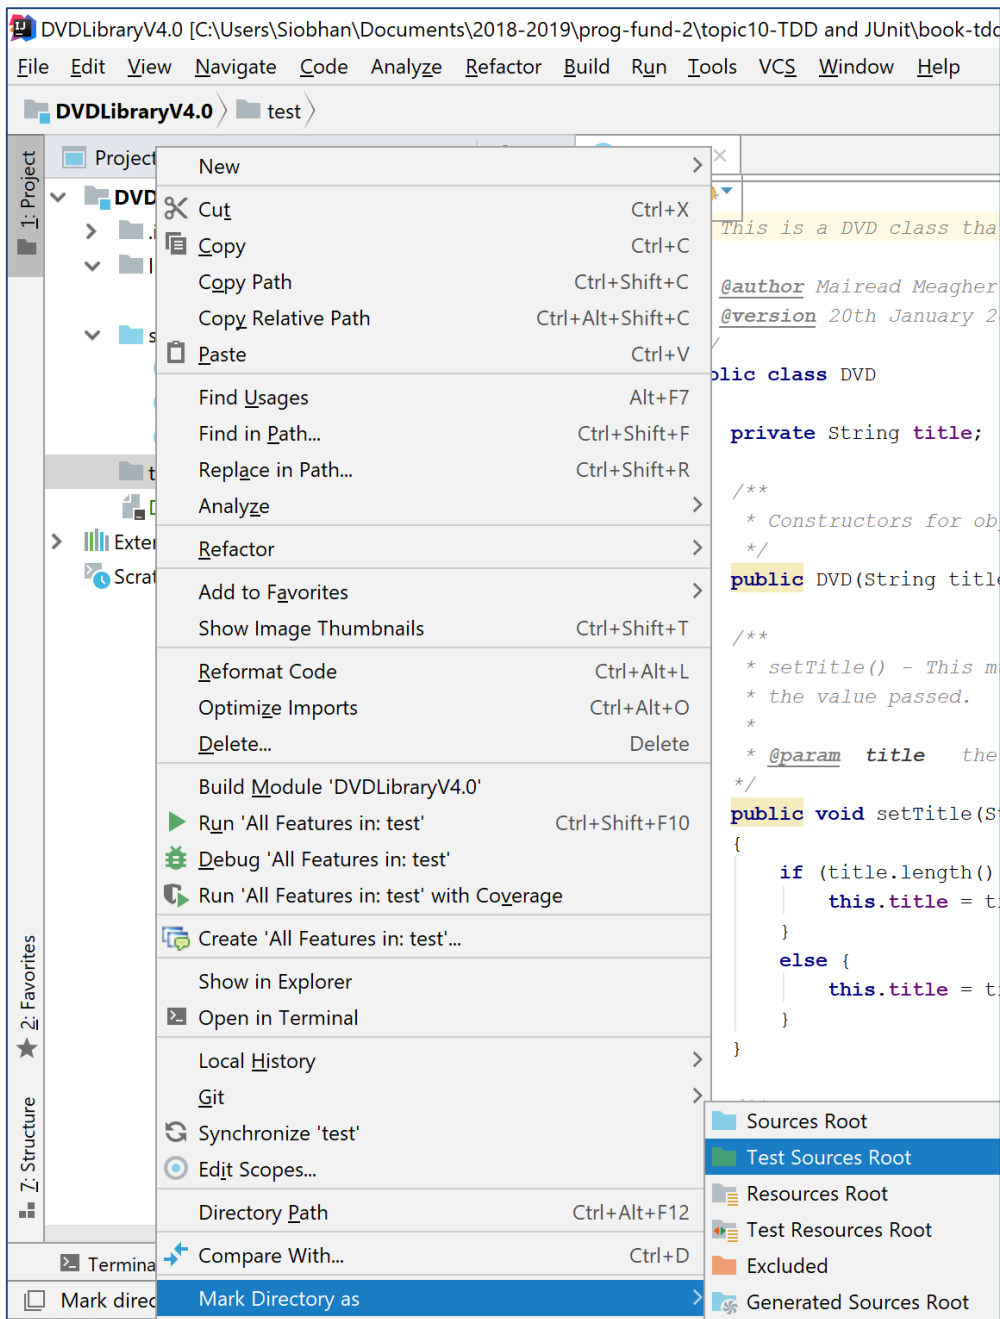

```
    public void setTitle(String title){
        if (title.length() <= 20){
            this.title = title
        }
        else{
            this.title = title.substring(0,20);
        }
    }

    public String toString(){
        return "DVD Title is: " + title;
    }
}
```

Creating a Test Source Directory...

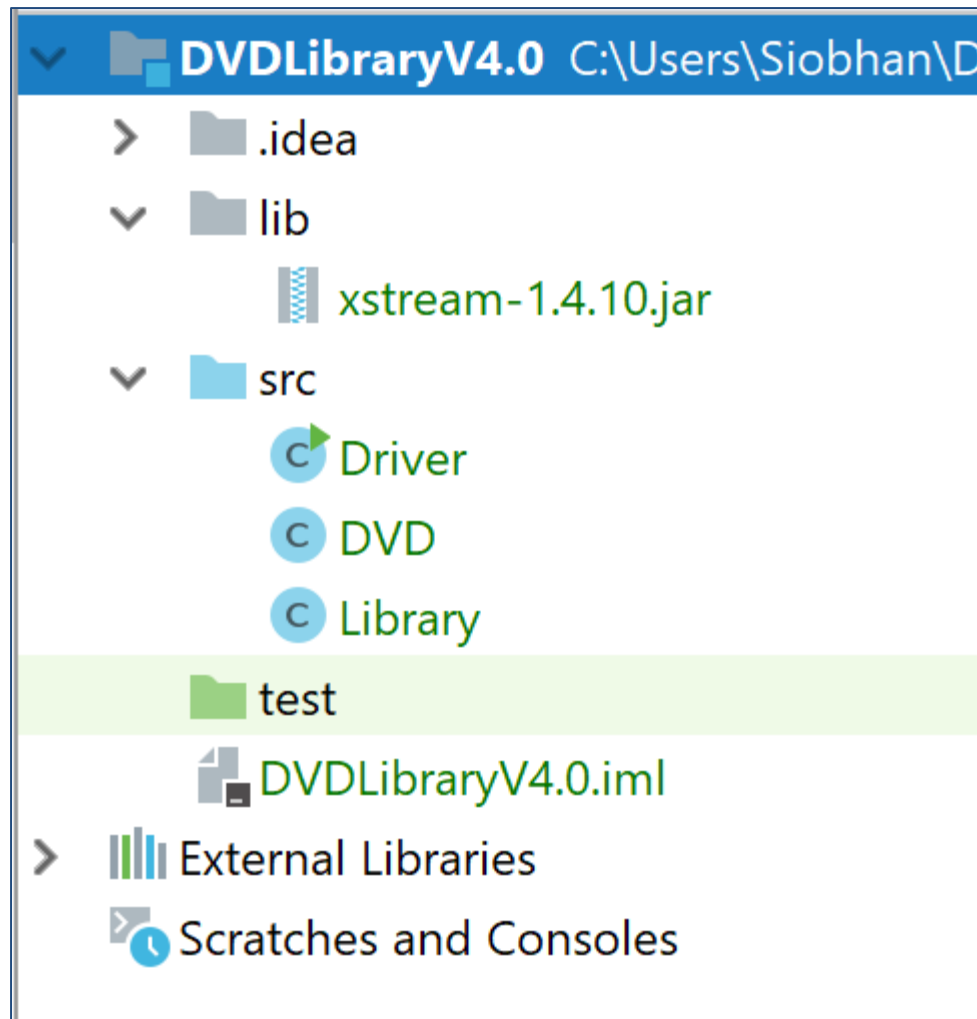

In IntelliJ, create a new “test” directory to hold your test classes

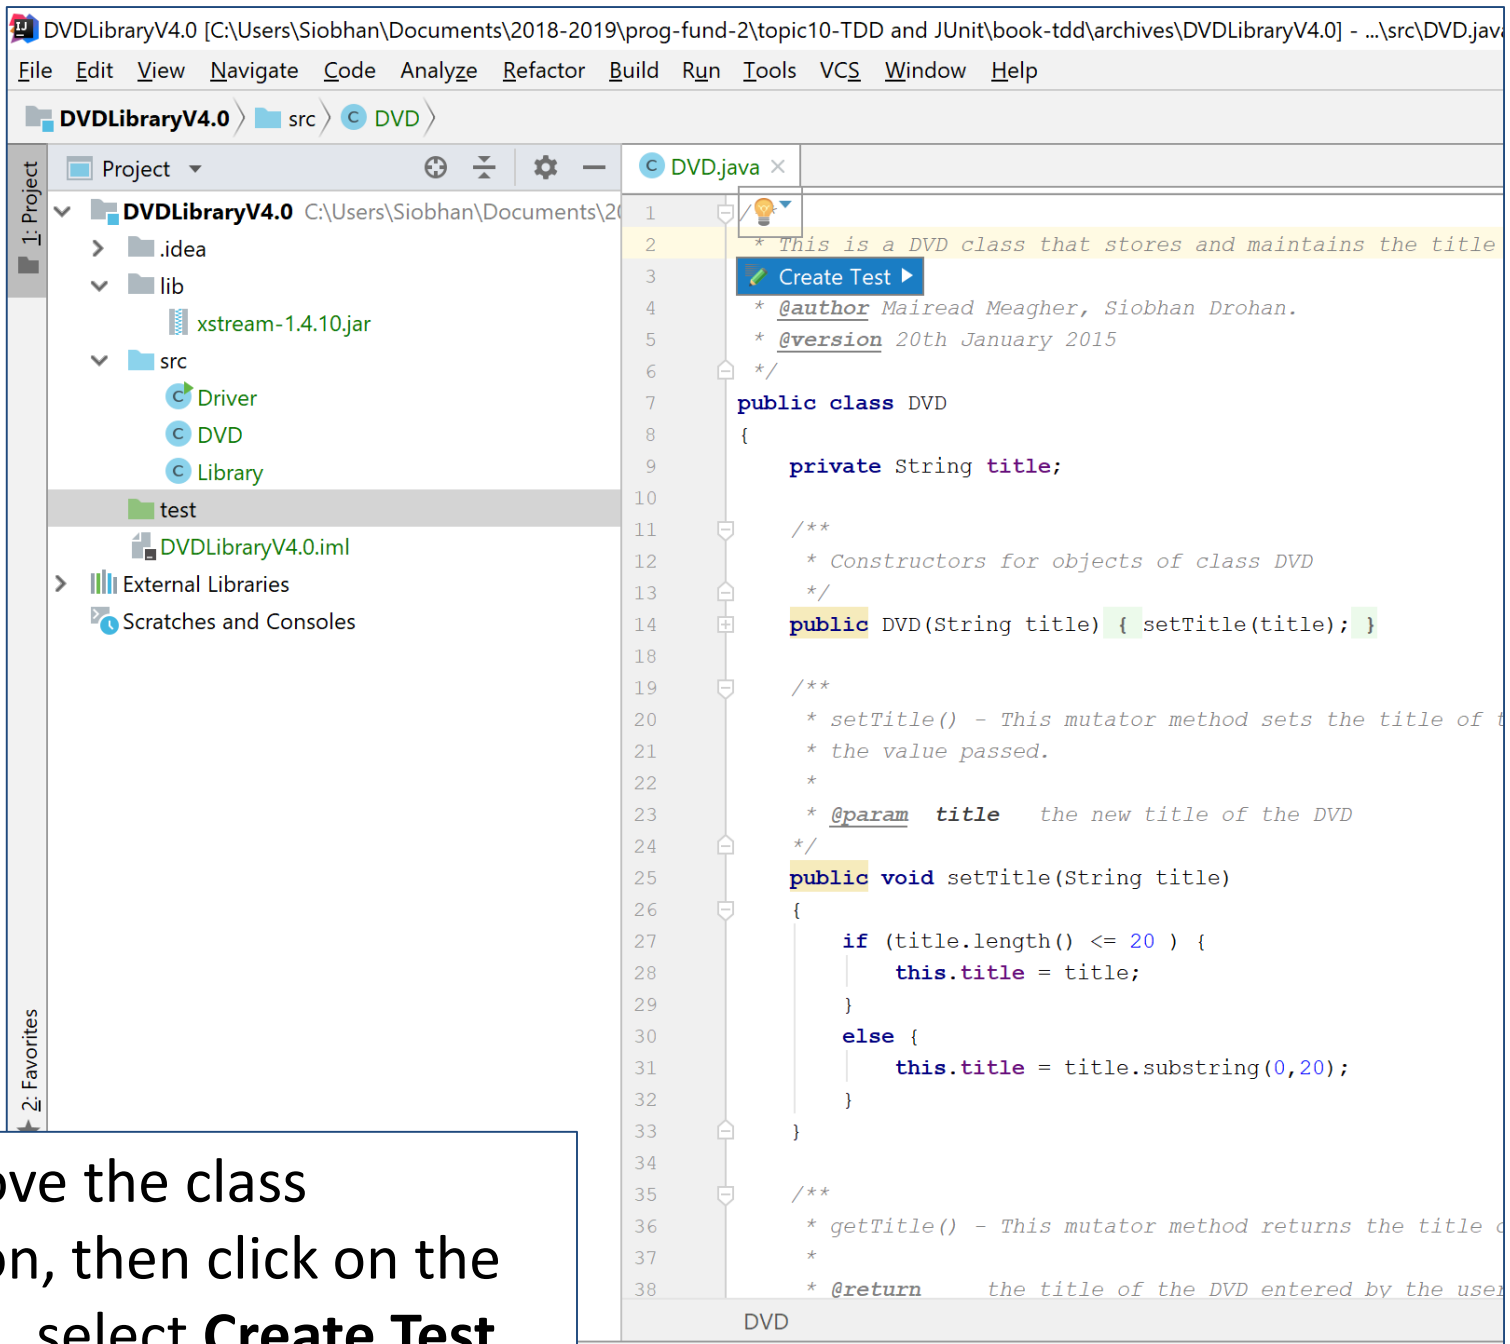

Then “mark”
this new
directory as a
Test Sources
Root directory

Current Folder Structure

Generating a test class for
DVD.Java ...

1

Click above the class declaration, then click on the light bulb...select **Create Test**

 Create Test ✕

Testing library: JUnit5 ▼

 JUnit5 library not found in the module Fix

Class name: DVDTest

Superclass: ▼ ...

Destination package: ▼ ...

Generate: ☐ setUp/@Before
☐ tearDown/@After

Generate test methods for: ☐ Show inherited methods

Member	
<input type="checkbox"/>	  setTitle(title:String):void
<input type="checkbox"/>	  getTitle():String
<input type="checkbox"/>	   toString():String

? OK Cancel

2

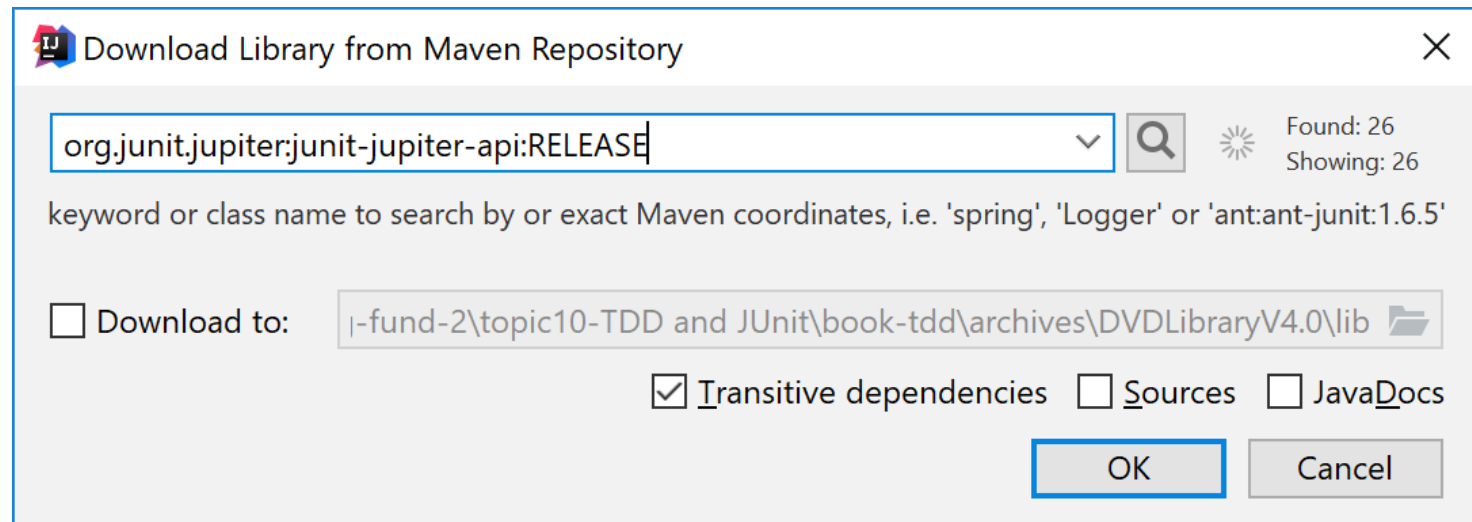

Choose JUnit5

3

Click the Fix
button...

4

...and click the
OK button to
download JUnit5
from Maven

Download Library from Maven Repository

DVD.java x DVDTest.java x

```
1 import org.junit.jupiter.api.AfterEach;
2 import org.junit.jupiter.api.BeforeEach;
3 import org.junit.jupiter.api.Test;
4
5 import static org.junit.jupiter.api.Assertions.*;
6
7 class DVDTest {
8
9     @BeforeEach
10    void setUp() {
11    }
12
13    @AfterEach
14    void tearDown() {
15    }
16
17    @Test
18    void setTitle() {
19    }
20
21    @Test
22    void getTitle() {
23    }
24
25    @Test
26    void toString() {
27    }
28 }
```

6

DVDTest.java is generated with starting code.

There is an error on the toString() method...to get rid of this, just rename it e.g. testToString().

DVDTest.Java

Writing and running tests...

Recap of DVD.java

```
public class DVD
{
    private String title;

    public DVD(String title){
        setTitle(title);
    }

    public DVD(){
    }

    public String getTitle(){
        return title;
    }
```

```
    public void setTitle(String title){
        if (title.length() <= 20){
            this.title = title
        }
        else{
            this.title = title.substring(0,20);
        }
    }

    public String toString(){
        return "DVD Title is: " + title;
    }
}
```

```

import org.junit.jupiter.api.AfterEach;
import org.junit.jupiter.api.BeforeEach;
import org.junit.jupiter.api.Test;

import static org.junit.jupiter.api.Assertions.*;

class DVDTest {
    private DVD dvd1, dvd2, dvd3;

    @BeforeEach
    void setUp() {
        dvd1 = new DVD("The Hobbit(Director)"); //title with 20 characters
        dvd2 = new DVD("The Steve Jobs Film"); //title with 19 characters
        dvd3 = new DVD("Avatar: Directors Cut"); //title with 21 characters
    }

    @AfterEach
    void tearDown() {
        dvd1 = dvd2 = dvd3 = null;
    }

    @Test
    void setTitle() {
    }

    @Test
    void getTitle() {
    }

    @Test
    void testToString() {
    }
}

```

7

DVDTest.java

Add three DVD objects and instantiate them with titles 19, 20 and 21 characters long (boundary test).

```

class DVDTest {

    private DVD dvd1, dvd2, dvd3;

    @BeforeEach
    void setUp() {
        dvd1 = new DVD("The Hobbit(Director)"); //title with 20 characters
        dvd2 = new DVD("The Steve Jobs Film"); //title with 19 characters
        dvd3 = new DVD("Avatar: Directors Cut"); //title with 21 characters
    }

    @AfterEach
    void tearDown() {
        dvd1 = dvd2 = dvd3 = null;
    }

    @Test
    void setTitle() {
    }

    @Test
    void getTitle() {
        assertEquals("The Hobbit(Director)", dvd1.getTitle());
        assertEquals("The Steve Jobs Film", dvd2.getTitle());
        assertEquals("Avatar: Directors Cu", dvd3.getTitle());
    }

    @Test
    void testToString() {
    }

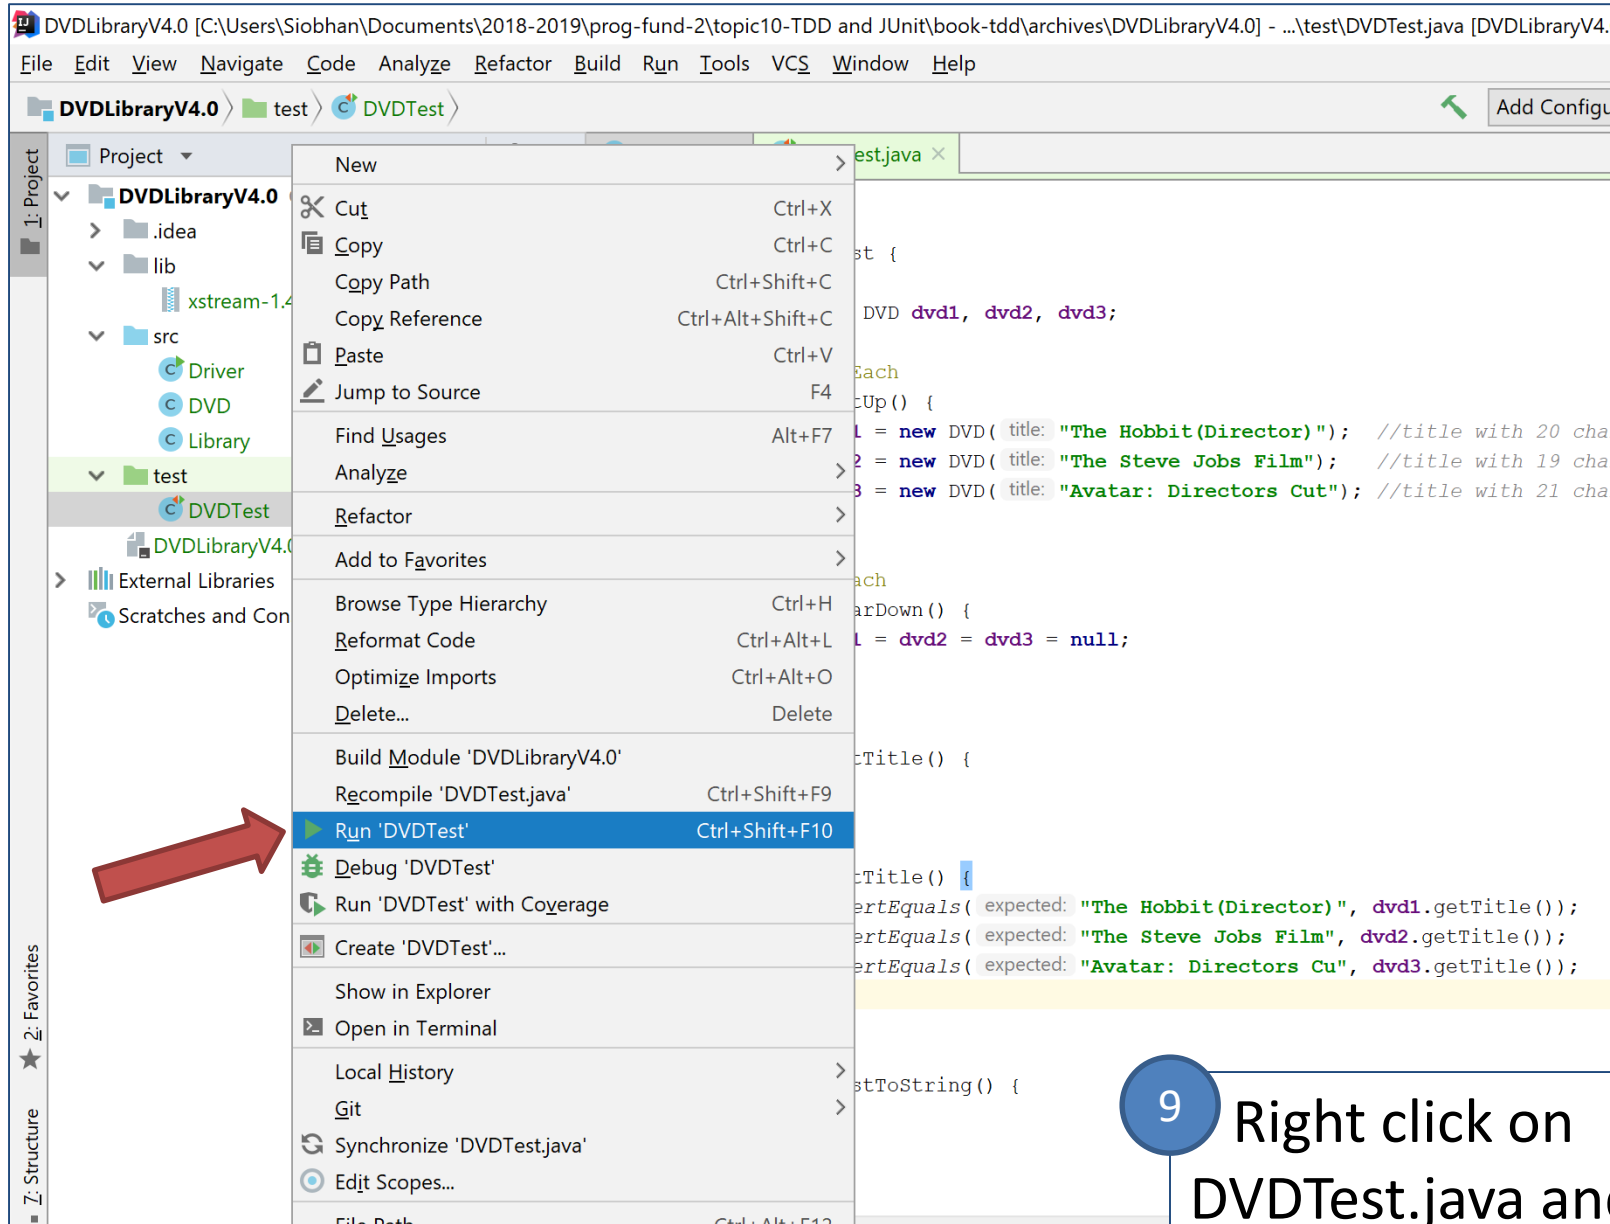

}

```

8

DVDTest.java

Include three assertions to test the getTitle() method (note: the constructor would have set up the object state).

9

Right click on
DVDTest.java and select
“Run DVDTest” from the
context menu.

Number of tests
that ran and passed

Run: DVDTest x

Tests passed: 3 of 3 tests – 30 ms

Test Results	30 ms
Test Results	30 ms
DVDTest	30 ms
testToString()	19 ms
setTitle()	1 ms
getTitle()	10 ms

"C:\Program Files\Java\jdk-10.0.2\bin\java.exe" ...

Process finished with exit code 0

Terminal 0: Messages 4: Run 6: TODO

Itemised tests and their
individual result.
Green = Pass

10

The results of the tests!

DVDTest.Java

Generating a test failure...

```

class DVDTest {

    private DVD dvd1, dvd2, dvd3;

    @BeforeEach
    void setUp() {
        dvd1 = new DVD("The Hobbit(Director)"); //title with 20 characters
        dvd2 = new DVD("The Steve Jobs Film"); //title with 19 characters
        dvd3 = new DVD("Avatar: Directors Cut"); //title with 21 characters
    }

    @AfterEach
    void tearDown() {
        dvd1 = dvd2 = dvd3 = null;
    }

    @Test
    void setTitle() {
    }

    @Test
    void getTitle() {
        assertEquals("The Hobbit(Director)", dvd1.getTitle());
        assertEquals("The Steve Jobs Film", dvd2.getTitle());
        //assertEquals("Avatar: Directors Cu", dvd3.getTitle());
        assertEquals("Avatar: Directors", dvd3.getTitle());
    }

    @Test
    void testToString() {
    }

}

```

1

Change the “expected”
portion of the assertEquals
to something invalid...

2

The results of the tests...we now have a failing test!

Number of tests that failed, passed and ran.

Run: DVDTest x

Tests failed: 1, passed: 2 of 3 tests - 71 ms

Test Results	71 ms
Test Results	71 ms
DVDTest	71 ms
testToString()	46 ms
setTitle()	
getTitle()	25 ms

org.opentest4j.AssertionFailedError:
Expected :Avatar: Directors
Actual :Avatar: Directors Cu
<Click to see difference>
<5 internal calls>
at DVDTest.getTitle(DVDTest.java:32)

Itemised tests and their individual result.

Green = Pass

Orange = Fail

Detail of the test failure

DVDTest.Java

Testing the setters...

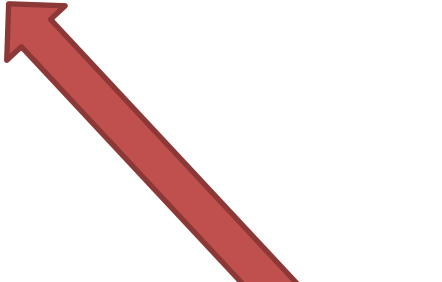

```
@Test
void setTitle() {
    dvd1.setTitle("The Hobbit");
    assertEquals ("The Hobbit", dvd1.getTitle());

    dvd1.setTitle("The Hobbit (Director)"); //attempting to set title to 21 characters
    assertEquals ("The Hobbit (Director)", dvd1.getTitle());

    dvd1.setTitle("The Hobbit(Director)"); //attempting to set title to 20 characters
    assertEquals ("The Hobbit(Director)", dvd1.getTitle());

    dvd1.setTitle("The Hobbit:Director"); //attempting to set title to 19 characters
    assertEquals ("The Hobbit:Director", dvd1.getTitle());
}

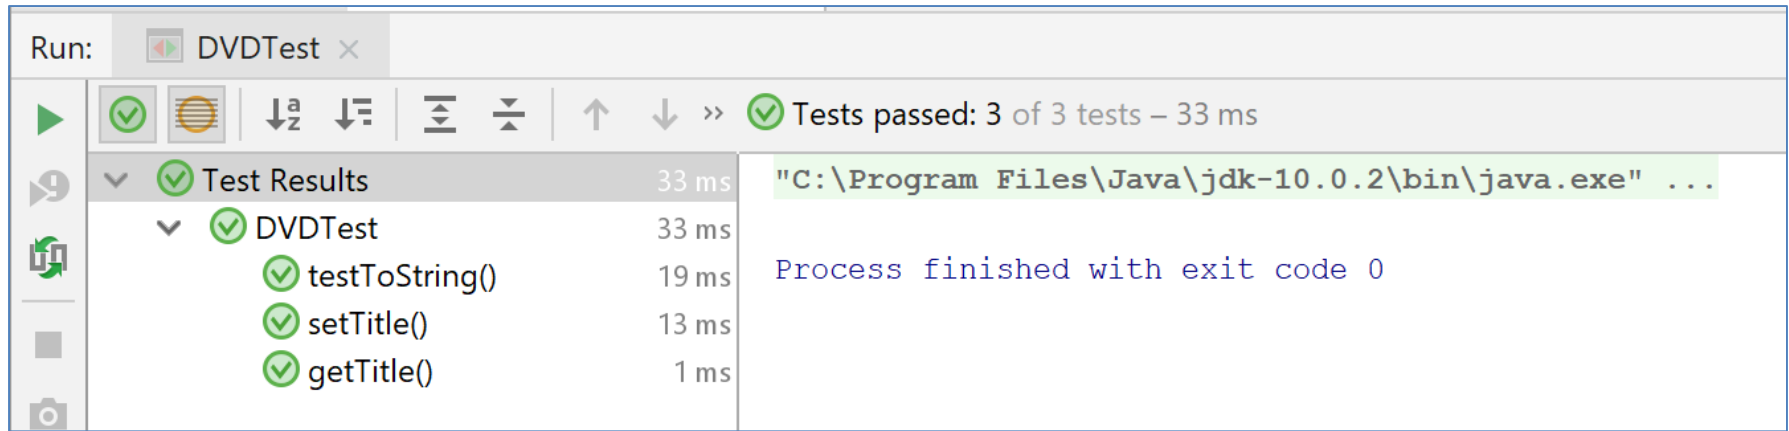

@Test
void getTitle() {
    assertEquals("The Hobbit(Director)", dvd1.getTitle());
    assertEquals("The Steve Jobs Film", dvd2.getTitle());
    assertEquals("Avatar: Directors Cu", dvd3.getTitle());
}
```

1

DVDTest.java

Attempting to set the title to 19, 20 and 21 characters long (boundary test).

2 All tests are passing

DVDTest.Java

Testing the toString...

```

class DVDTest {

    private DVD dvd1, dvd2, dvd3;

    @BeforeEach
    void setUp() {
        dvd1 = new DVD("The Hobbit(Director)"); //title with 20 characters
        dvd2 = new DVD("The Steve Jobs Film"); //title with 19 characters
        dvd3 = new DVD("Avatar: Directors Cut"); //title with 21 characters
    }

    @AfterEach
    void tearDown() {
        dvd1 = dvd2 = dvd3 = null;
    }

    @Test
    void setTitle() {
        //code omitted
    }

    @Test
    void getTitle() {
        //code omitted
    }

    @Test
    void testToString() {
        assertEquals("DVD Title is: The Hobbit(Director)", dvd1.toString());
        assertEquals("DVD Title is: The Steve Jobs Film", dvd1.toString());
        assertEquals("DVD Title is: Avatar: Directors Cu", dvd1.toString());
    }

}

```

1

DVDTest.java

Asserting that the toString is returning the contents of the title field. **Does this look right? Will it run successfully?**

Run: DVDTest x

Tests failed: 1, passed: 2 of 3 tests – 34 ms

Test Results	34 ms
! DVDTest	34 ms
! testToString()	32 ms
✓ setTitle()	1 ms
✓ getTitle()	1 ms

org.opentest4j.AssertionFailedError:
Expected :DVD Title is: The Steve Jobs Film
Actual :DVD Title is: The Hobbit(Director)
[<Click to see difference>](#)

[+ <5 internal calls>](#)
at DVDTest.testToString([DVDTest.java:48](#))

```
class DVDTest {

    private DVD dvd1, dvd2, dvd3;

    @BeforeEach
    void setUp() {
        dvd1 = new DVD("The Hobbit(Director)"); //title with 20 characters
        dvd2 = new DVD("The Steve Jobs Film"); //title with 19 characters
        dvd3 = new DVD("Avatar: Directors Cut"); //title with 21 characters
    }

    @AfterEach
    void tearDown() {
        dvd1 = dvd2 = dvd3 = null;
    }

    @Test
    void setTitle() {
        //code omitted
    }

    @Test
    void getTitle() {
        //code omitted
    }

    @Test
    void testToString() {
        assertEquals("DVD Title is: The Hobbit(Director)", dvd1.toString());
        assertEquals("DVD Title is: The Steve Jobs Film", dvd1.toString());
        assertEquals("DVD Title is: Avatar: Directors Cut", dvd1.toString());
    }

}
```

We are referencing the wrong dvd objects in the last two method calls.

```
@Test
void testToString() {
    assertEquals("DVD Title is: The Hobbit(Director)", dvd1.toString());
    assertEquals("DVD Title is: The Steve Jobs Film", dvd2.toString());
    assertEquals("DVD Title is: Avatar: Directors Cu", dvd3.toString());
}
```

We are now referencing the correct dvd objects, so our test is now successful.

Run: DVDTest x

Tests passed: 3 of 3 tests – 27 ms

Test Results	27 ms	"C:\Program Files\Java\jdk-10.0.2\bin\java.exe" ...
▼ DVDTest	27 ms	
✓ testToString()	24 ms	Process finished with exit code 0
✓ setTitle()	1 ms	
✓ getTitle()	2 ms	

DVDTest.Java

Have we tested everything in
DVD.java?

DVD.java

```
public class DVD
{
    private String title;

    public DVD(String title){
        setTitle(title);
    }

    public DVD(){
    }

    public String getTitle(){
        return title;
    }
```

```
    public void setTitle(String title){
        if (title.length() <= 20){
            this.title = title
        }
        else{
            this.title = title.substring(0,20);
        }
    }

    public String toString(){
        return "DVD Title is: " + title;
    }
}
```

1

DVDTest.java

We can get IntelliJ to highlight the code in DVD.java that hasn't been tested by DVDTest.java

....code coverage of tests!

The screenshot shows an IDE with two tabs: DVD.java and DVDTest.java. The DVD.java file is open, showing a public class DVD with a private String title and a public DVD(String title) constructor. The DVDTest.java file is also open, showing a public DVD() method. The coverage data is displayed in a table on the right side of the IDE.

Element	Class, %	Method, %	Line, %
com			
images			
java			
javafx			
javax			
jdk			
META-INF			
netscape			
oracle			
org			
sun			
toolbarButtonGraphics			
Driver	0% (0/1)	0% (0/7)	0% (0/73)
DVD	100% (1/1)	80% (4/5)	81% (9/11)
Library	0% (0/1)	0% (0/7)	0% (0/24)

3 DVD.java is colour coded after the coverage...green for fully tested and red for not tested.

2 Test Coverage of DVD.java is 80% at method level...we missed something!

```

class DVDTest {

    private DVD dvd1, dvd2, dvd3, dvd4;

    @BeforeEach
    void setUp() {
        dvd1 = new DVD("The Hobbit(Director)"); //title with 20 characters
        dvd2 = new DVD("The Steve Jobs Film"); //title with 19 characters
        dvd3 = new DVD("Avatar: Directors Cut"); //title with 21 characters
        dvd4 = new DVD();
    }

    @AfterEach
    void tearDown() {
        dvd1 = dvd2 = dvd3 = dvd4 = null;
    }

    @Test
    void setTitle() {
        //code omitted
    }

    @Test
    void getTitle() {
        assertEquals("The Hobbit(Director)", dvd1.getTitle());
        assertEquals("The Steve Jobs Film", dvd2.getTitle());
        assertEquals("Avatar: Directors Cu", dvd3.getTitle());
        assertEquals(null, dvd4.getTitle());
    }

    @Test
    void testToString() {
        //code omitted
    }
}

```

4

We have added a new fixture, dvd4 and tested it in getTitle().

DVD.java × DVDTest.java ×

```
6  */
7  public class DVD
8  {
9      private String title;
10
11     /**
12      * Constructors for objects of class DVD
13      */
14     public DVD(String title)
15     {
16         setTitle(title);
17     }
18
19     public DVD() {
20     }
21
22     /**
23      * setTitle() - This mutator method sets the title of the DVD
```

Coverage: DVDTest ×

33% classes, 10% lines covered in 'all classes in scope'
